Passage: How to Make Slime

Making slime is a fun and easy craft project that requires just a few common ingredients.

To make your slime, you will need the following materials:

- 1 cup of white glue
 - 1 cup of water
 - Food coloring (optional)
 - 1 tablespoon of borax powder
 - 1 additional cup of water to mix with the borax.
1. **Mix the white glue with one cup of water in a bowl. Stir well to combine the two ingredients thoroughly. (If you want to add color to your slime, put a few drops of food coloring into the glue mixture and stir until you achieve your desired shade.)**
 2. **Mix one tablespoon of borax powder in a separate bowl with one cup of water. Stir until the borax is completely dissolved.**
 3. **Slowly add the borax solution to the glue mixture, stirring continuously. You will notice the slime beginning to form as you mix. Keep stirring until the slime reaches your preferred consistency.**
 4. **Once the slime is ready, remove it from the bowl and knead it with your hands for a few minutes. This will help improve the texture and make it more stretchy.**

TIP: Store your slime in an airtight container to keep it fresh and prevent it from drying out.

Multiple Choice:

1. What is the first step in making slime?
 - A) Add food coloring to the glue mixture
 - B) Mix white glue with one cup of water
 - C) Add borax powder to the glue mixture
 - D) Knead the slime with your hands

2. Why do you need to stir the borax powder in water until it is completely dissolved?
 - A) To make the slime more colorful
 - B) To ensure the slime has the right consistency
 - C) To help the slime form correctly
 - D) To improve the smell of the slime
3. What should you do if you want to add color to your slime?
 - A) Add more borax powder
 - B) Add a few drops of food coloring to the glue mixture
 - C) Use a different type of glue
 - D) Increase the amount of water
4. How do you achieve the right consistency for the slime?
 - A) By adding more glue
 - B) By kneading the slime with your hands
 - C) By stirring the slime mixture continuously
 - D) By letting the slime sit for 24 hours
5. How should you store the slime to keep it fresh?
 - A) In a paper bag
 - B) In an airtight container
 - C) In the refrigerator
 - D) In an open bowl

Short Answer:

6. What is the purpose of adding borax powder to the glue mixture? Write your answer in a complete sentence.

7. Describe the process of adding food coloring to the slime mixture. When should you add it? Write your answer in a complete sentence.

8. Explain why kneading the slime by hand is an important step in the process. Write your answer in a complete sentence.
