

Unit 7: Matrices — Cryptography Project

Criteria	4 – Excellent	3 – Good	2 – Fair	1 – Poor	0 – Missing
Matrix Setup	Correct coding/decoding matrix created, variables defined	Mostly correct; minor flaw	Attempt incomplete	Minimal	None
Encoding & Decoding	Both processes shown and correct	One correct, one flawed	Attempted with major errors	Minimal	None
Math Accuracy	Matrix operations accurate	Minor arithmetic error	Several errors	Mostly incorrect	None
Application	Clear link to cryptography/real-world uses	Mentioned but vague	Weak connection	Minimal	None
Creativity & Presentation	Original code, neat, visually appealing	Clear but less creative	Plain	Minimal	None
